

CyrusOne Names Brian Doricko to Strategic Accounts Role

April 11, 2018

20-year industry veteran to focus on driving global cloud and enterprise growth for data center leader

DALLAS--(BUSINESS WIRE)--Apr. 11, 2018-- CyrusOne (NASDAQ:CONE), a premier global data center REIT, today named data center veteran Brian Doricko vice president, strategic accounts. Doricko will work with CyrusOne's cloud and enterprise accounts as the company expands into new markets globally. Doricko most recently served as chief revenue officer and senior vice president, sales, DuPont Fabros Technology, prior to that company's acquisition by Digital Realty Trust. Previously he held sales leadership positions with Digital Realty Trust and Savvis Communications Corporation.

"In the consulting work I've done with end users in the past year, it has been clear that CyrusOne is driving innovation around engineering, interconnection, and speed to market to provide the solutions that clients are asking for at both the hyperscale and enterprise levels," said Doricko. "It is a rare opportunity to be working for a company that has been winning both the mindshare and trust of clients by acting very specifically to help them achieve their business objectives not only here in the US but globally as well."

"I've known Brian as a talented, knowledgeable, hard-working competitor for nearly 20 years, and I'm thrilled to have him join our team," said Tesh Durvasula, chief commercial officer, CyrusOne. "In addition to his understanding of client needs, Brian's solutions-oriented approach is fully aligned with CyrusOne's as we continue to expand and deepen our cloud and Fortune 1000 relationships worldwide."

CyrusOne operates 45 [data center facilities](#) across the United States, Europe, and Asia to provide customers with the flexibility and scale to match their specific IT growth needs. CyrusOne facilities are engineered to include the power-density infrastructure required to deliver high availability, including architecture with the highest available [power redundancy \(2N\)](#).
