

## IBM Cloud Direct Link Now Available in CyrusOne Data Centers

February 1, 2019

*Located in CyrusOne's Carrollton Facility, Customers Across the United States Will Have Dedicated Access to IBM Cloud Via CyrusOne's National IX*

DALLAS--(BUSINESS WIRE)--Feb. 1, 2019-- CyrusOne (NASDAQ: CONE), a premier global data center REIT, today announced the availability of IBM Cloud Direct Link within CyrusOne's Carrollton, Texas data center to support customers in the U.S. via CyrusOne's National IX. IBM Cloud Direct Link provides customers with a secured, dedicated network connection from their own IT infrastructure to the IBM Cloud.

"We are excited to welcome IBM Cloud into the CyrusOne ecosystem. IBM is a world leader in cloud services, and connecting to our National IX provides a competitive advantage for customers in Texas and across the United States," said John Gould, executive vice president and chief commercial officer, CyrusOne. "The Dallas Metro Area has seen rapid growth in cloud services, and locating in our state-of-the-art Carrollton facility provides the lowest latency for customers in the Texas markets."

"As businesses enter the next phase of the cloud journey, it's important to have an open, hybrid approach to develop, run and deploy applications across multicloud environments," said Gabriel Montanti, Global Offering Executive, IBM Cloud. "The collaboration with CyrusOne is part of the expanding IBM Cloud Direct Link service provider program, which provides businesses with dedicated private connectivity with low latency so they can optimize their hybrid cloud strategy."

CyrusOne National IX delivers interconnection across states and between metro-enabled sites within the CyrusOne facility footprint and beyond. The platform enables high-performance, low-cost data transfer and accessibility for customers and unites CyrusOne data centers throughout the United States. With dedicated connectivity to the IBM Cloud, businesses have a secured path to migrate sensitive workloads and data to the cloud and take advantage of next generation services including AI, analytics, blockchain and more.

CyrusOne operates more than 45 [data center facilities](#) across the United States, Europe, and Asia to provide customers with the flexibility and scale to match their specific IT growth needs. CyrusOne facilities are engineered to include the power-density infrastructure required to deliver high availability, including an architecture with the highest available [power redundancy](#).
