

# Fourth Quarter 2014 Earnings Presentation

February 18, 2015

## Safe Harbor

### Forward-looking statements

This presentation contains forward-looking statements regarding future events and our future results that are subject to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as “expects,” “anticipates,” “predicts,” “projects,” “intends,” “plans,” “believes,” “seeks,” “estimates,” “continues,” “endeavors,” “strives,” “may,” variations of such words and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned these forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties, which could cause our actual results to differ materially and adversely from those reflected in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this release and those discussed in other documents we file with the Securities and Exchange Commission (SEC). More information on potential risks and uncertainties is available in our recent filings with the SEC, including CyrusOne’s Form 10-K report, Form 10-Q reports, and Form 8-K reports. Actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update any forward-looking statements for any reason.

# Highlights

## Fourth Quarter 2014

- Fourth quarter revenue of \$86.9 million and full year revenue of \$330.9 million increased 20% and 26%, respectively, over fourth quarter and full year 2013
- Fourth quarter Normalized FFO of \$31.2 million and AFFO of \$29.8 million increased 32% and 43%, respectively, over the fourth quarter of 2013
- Full year Normalized FFO of \$112.9 million and AFFO of \$111.7 million increased 43% and 54%, respectively, over full year 2013
- Fourth quarter Adjusted EBITDA of \$44.6 million and full year Adjusted EBITDA of \$169.3 million increased 12% and 22%, respectively over fourth quarter and full year 2013
- Announced a 50% increase in the quarterly dividend and distribution for the first quarter of 2015 to \$0.315 per share on common shares and common share equivalents, up from \$0.21 per share in 2014
- Leased 44,000 colocation square feet<sup>(1)</sup> in the fourth quarter, with utilization remaining high at 88%, increasing full year 2014 leasing to 236,000 colocation square feet and bringing development yield to 18%
- Added three Fortune 1000 companies as new customers in the fourth quarter, increasing the total number of Fortune 1000 customers to 144, and fifteen Fortune 1000 companies for full year 2014

**Note:**

1. Colocation square feet (CSF) represents NRSF currently leased or available for lease as colocation space, where customers locate their servers and other IT equipment. Net rentable square feet (NRSF) represents the total square feet of a building currently leased or available for lease, based on engineers' drawings and estimates but does not include space held for development or space used by CyrusOne.

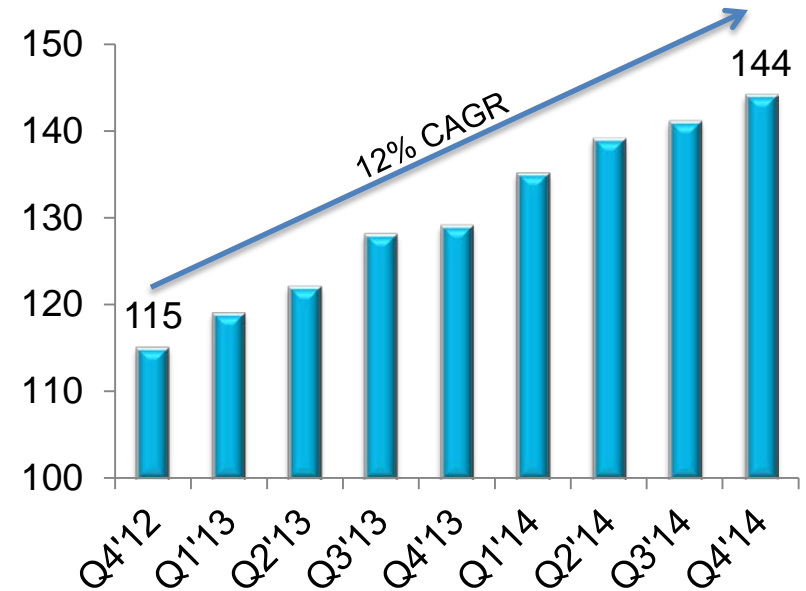

# New Customers

Steady growth in customer base

### Total Customers<sup>(1)</sup>

### Fortune 1000 Customers<sup>(1,2)</sup>

**Note:**

1. Customers as of quarter-end for each period, including customers that are under lease but have yet to occupy space.
2. Customer's ultimate parent is a Fortune 1000 company or a foreign or private company of equivalent size.

# Development Yield

Development yields consistently in mid-upper teens

### Annualized NOI (\$MM)

### Inv. in Real Estate (\$MM)

Inv. in Real Estate, less CIP

**Development Yield<sup>(1)</sup>**

**Able to maintain upper-teen yield even with 46% increase in investment since Q1'13**

- Development yield of 18% includes development properties that are not yet stabilized
- The yield for development properties is projected to improve over time as high fixed costs are allocated across incremental leasing

**Notes:**

1. Development Yield is calculated by dividing annualized Net Operating Income (NOI) by total investment in real estate, less construction in progress.

# Multiple Sources of Growth

Both “same-store” and “development” growth

## Escalators

- Emphasis on incorporating into leases since IPO
- On an MRR-weighted<sup>(1)</sup> basis, 72% of new leases signed in 2014 have rent escalators at a weighted average annual rate of 2.7%

## IX / Ancillary Services

- High-margin products and services such as IX, office space, and Smart Hands are often incremental additions that enhance returns
- Q4'14 IX revenue 63% higher compared to Q1'13
- 27% of new MRR<sup>(1)</sup> signed in 2014 from products and services that did not include additional data center space

## Lease-up of Existing Inventory

- Lease-up of available space and power by existing and new customers
- More than 50% of new MRR<sup>(1)</sup> from existing customers
- Growth from new customers; 27% increase in customer base since end of 2012

## Robust Development Pipeline

- Land and powered shell capacity to grow to 5M CSF
- Low cost of development
- Lease-up of existing inventory is catalyst for additional development
- Limited capital at risk given construction efficiency

**Notes:**

1. Monthly recurring rent is defined as average monthly contractual rent during the term of the lease. Contractual rent does not include metered power reimbursements.

# Interconnection

Strong growth in cross-connects and revenue

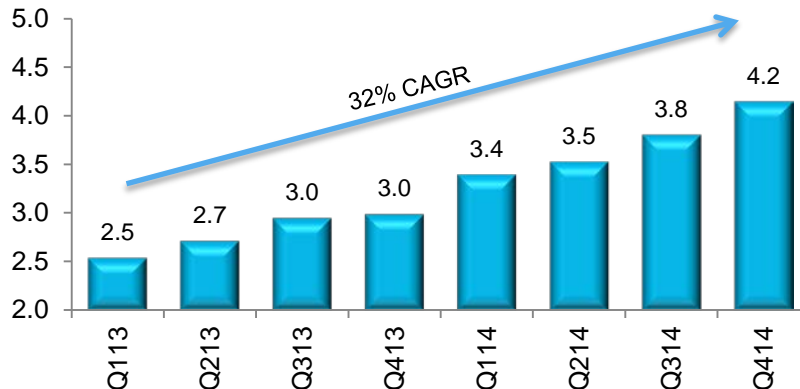

## Benefits to Customer

- Convenience of an integrated infrastructure solution
- Enhances quality/performance for enterprises by using the same industry-leading connectivity technology as content companies
- Offers significant cost savings due to access to wholesale carrier pricing

## Benefits to CyrusOne

- Adds to “stickiness” of CyrusOne data center solutions
- Enables penetration into new customer ecosystems
- Increases probability of customer renewals
- Growth of low cap-ex and high margin / EBITDA contributing products, enabling “same-store” sales growth

Quarterly Interconnection Revenue (\$MM)

- National IX platform launched in Q2'13
- 63% growth in IX revenue from Q1'13 to Q4'14
- National IX has enabled signing of colocation leases in excess of \$100M in total contracted revenue

# Development Yield Trend - San Antonio / Houston West 2

## Increase in development yield over time

- San Antonio facility brought online in Q3'12
- In Q3'13 customer took down remainder of raised floor, with expectations at time of stabilized development yield for facility of approximately 15%
- As a result of ancillary products and services sold, development yield up to approximately 18% as of Q4'14

- Houston West 2 facility brought online in Q2'13
- Facility is fully built out and 73% leased as of Q4'14, with development yield of 15%
- Development yield could reach 18+% once fully leased

# Development Yield Trend - Carrollton

Yields increase over time with lease-up

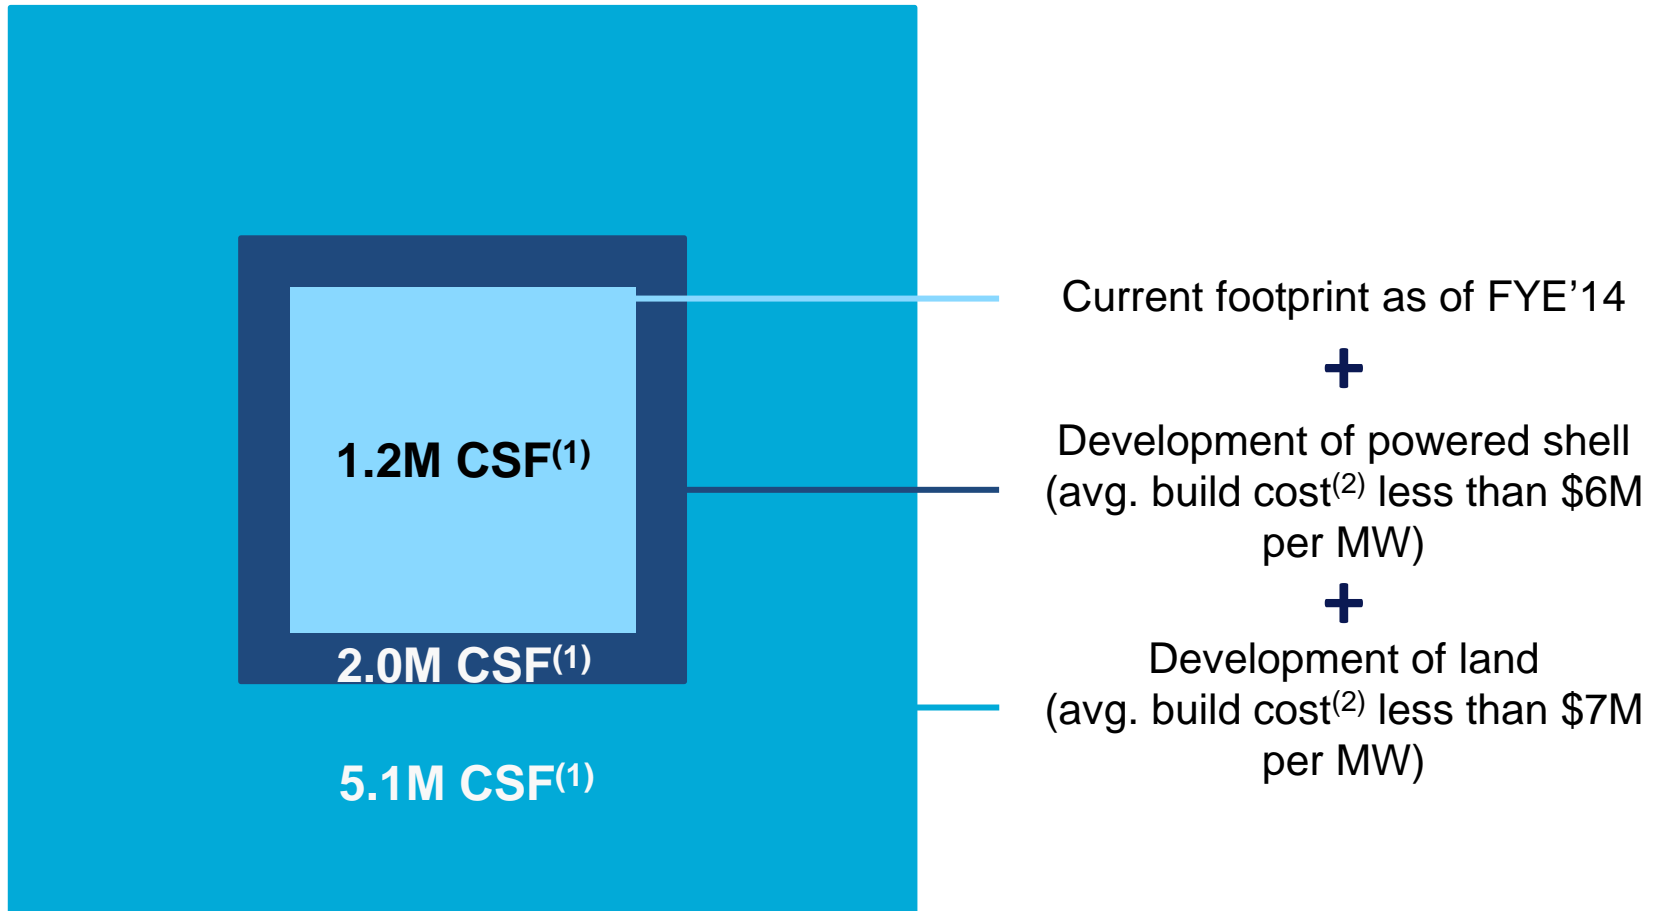

- Carrollton facility can eventually accommodate 7 data halls; 3 currently built out
- Investment in Carrollton of nearly \$100 million represents almost a quarter of company's total investment in real estate over last two years

- Between Q4'13 and Q4'14 development yield increased from 3% to 13%, despite almost \$60M in additional investment
- Forecasted development yields are based on current build costs, leasing velocity, market prices, and forecasted incremental operating expenses
- For a facility the size of Carrollton there is significant operating leverage and development yields could eventually reach the upper teens to twenty-plus percent

# Portfolio Expansion

## Capacity to grow existing footprint

### Notes

1. Colocation square feet (CSF) represents NRSF leased or available for lease as colocation space, where customers locate their servers and other IT equipment. Net rentable square feet (NRSF) represent the total square feet of a building leased or available for lease based on engineers' drawings and estimates but does not include space held for development or space used by CyrusOne.
2. Average build cost based on company estimates using a power density of 150 watts per colocation square foot.

# Lower Oil Prices

## No material negative impact expected

- Increasing focus on compelling outsourcing economics when capital is constrained, as we can both build and operate at a much lower cost than our customers
- Data center industry revenue growth of 18-20% from 2008 to 2010 during challenging economic times

- Cyrus Networks revenue increased significantly from 2008 to 2009 as WTI crude oil prices declined dramatically, bottoming out in the low \$30 range

Revenue up significantly from 2008 to 2009...

...as average WTI crude price declined nearly 40%

# Lower Oil Prices

No material negative impact expected

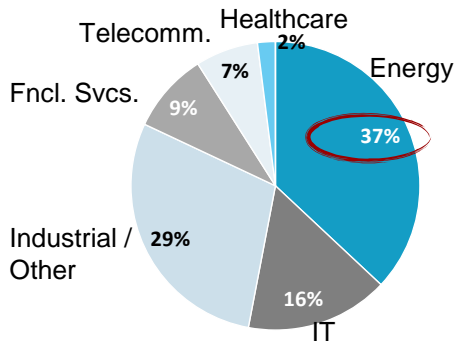

- Annualized Rent<sup>(1)</sup> from top 10 Oil & Gas customers ~0.006% of customer LTM operating expenses

CyrusOne Top 10 Oil & Gas Customers (\$MM)

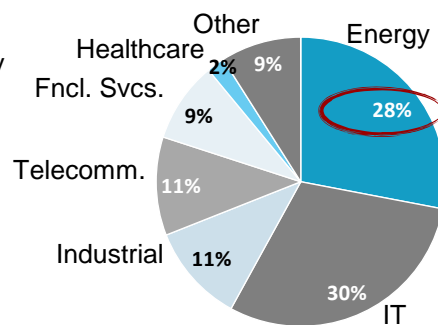

- We have been less dependent on the Energy vertical as a source of growth over the last 2 years...

Dec'12 % of Annualized Rent<sup>(1)</sup> (\$MM)

Dec'14 % of Annualized Rent<sup>(1)</sup> (\$MM)

Energy MRR<sup>(2)</sup> (\$MM)

Non-Energy MRR<sup>(2)</sup> (\$MM)

- ...however we are still seeing healthy contributions
  - Energy vertical very consistent throughout 2014, contributing approximately \$125K-\$135K in new MRR<sup>(2)</sup> each quarter

Notes:

1. Annualized Rent represents cash rent, including metered power reimbursements, for the month of December 2014 multiplied by 12.  
 2. Monthly recurring rent is defined as average monthly contractual rent during the term of the lease. Contractual rent does not include metered power reimbursements.

# Texas

## Economy driven by more than oil & gas

- Oil taxes as a share of state revenue down from 13% in the 1980's to approximately 4-6% over the last several years
- Texas has added more net new jobs since 2007 than the other 49 states combined

- More than 20 new logos signed in 2014 with deployments in Texas headquartered outside of the state
- More than 25 non-oil and gas F500 companies headquartered in Texas

## Lower Oil Prices & Texas

### Recap

- ✓ Data centers are part of a secular outsourcing trend, resistant to business declines
- ✓ Spending by Oil & Gas customers with CyrusOne is insignificant relative to total operating expense
- ✓ Proportion of business from Energy customers down from 37% two years ago to 28% as of December 2014
  - 7% compound annual growth rate over the last two years compared to 30% across other verticals
- ✓ Texas not nearly as dependent on Oil & Gas as some may fear

## Fourth Quarter 2014 Financial Review

# Revenue

Continued strong organic growth driven by existing and new customers

## Fourth Quarter

(\$ Millions)

## Churn

Recurring Rent Quarterly Churn<sup>(1)</sup>

### Revenue growth of 20% driven by:

- Expansion of customer base to 669, an increase of 57 from Q4'13
- Increases in leased CSF<sup>(2)</sup> and annualized rent<sup>(3)</sup> of 21% and 22%, respectively, compared to Q4'13
- Full year 2014 revenue growth of 26%

### Leased 44,000 CSF<sup>(2)</sup> and 5.3 MW

- 78% of the CSF<sup>(2)</sup> was leased to metered power customers with a weighted average lease term of 69 months
- 80% of new leases have escalators at a weighted average rate of 2.6%
- Leased record 236,000 CSF<sup>(2)</sup> during 2014, up 33% from 2013

### Churn

- Sequential reduction in churn to level more in line with first two quarters of 2014

#### Notes:

- Recurring Rent Quarterly Churn is defined as any reduction in recurring rent due to customer terminations, service reductions or net pricing decreases as a percentage of rent at the beginning of the quarter, excluding any impact from metered power reimbursements or other usage-based or variable billing.
- Colocation square feet (CSF) represents NRSF leased or available for lease as colocation space, where customers locate their servers and other IT equipment. Net rentable square feet (NRSF) represent the total square feet of a building leased or available for lease based on engineers' drawings and estimates but does not include space held for development or space used by CyrusOne.
- Annualized Rent represents cash rent, including metered power reimbursements, for the month of December 2014 multiplied by 12.

# Lease Commencements

## Phasing of new leases and total backlog

**Q4'14 Leases - Estimated Annualized GAAP Revenue<sup>(1)</sup> Commenced by End of Period (\$ Millions) (excl. estimates of pass-through power)**

**Total Backlog - Estimated Annualized GAAP Revenue<sup>(1)</sup> Commenced by End of Period (\$ Millions) (excl. estimates of pass-through power)**

- Estimates on lease commencements for future quarters are based on current estimated installation timelines
- 33% of Annualized GAAP Revenue<sup>(1)</sup> for leases signed during Q4'14 expected to commence by the end of the fourth quarter
- Including estimates for pass-through power charges, leases signed during Q4'14 represent approximately \$13.9M of annualized GAAP revenue<sup>(1)</sup>
- Total Annualized GAAP Revenue<sup>(1)</sup> backlog of \$9.2M as of the end of Q4'14, with almost all expected to commence by the end of Q1'15

**Notes:**

1. Annualized GAAP Revenue is equal to monthly recurring rent, defined as average monthly contractual rent during the term of the lease, multiplied by 12. It can be shown both inclusive and exclusive of the Company's estimate of customer reimbursements for metered power.

# Year over Year P&L Analysis

High growth rates across all key financial metrics

| (\$ Millions)                                 | Three Months Ended |                | Fav/(Unfav)    |            |
|---|--------------------|----------------|----------------|------------|
|   | Q4 2014            | Q4 2013        | \$             | %          |
| Revenue                                       | \$ 86.9            | \$ 72.3        | \$ 14.6        | 20%        |
| Property operating expenses                   | 32.0               | 24.3           | (7.7)          | -32%       |
| <b>Net Operating Income (NOI)</b>             | <b>54.9</b>        | <b>48.0</b>    | <b>6.9</b>     | <b>14%</b> |
| <i>NOI Margin</i>                             | 63%                | 66%            |                |            |
| Sales and Marketing                           | 3.1                | 2.6            | (0.5)          | -19%       |
| General and Administrative                    | 9.9                | 6.8            | (3.1)          | -46%       |
| Less: Non-cash Compensation                   | (2.7)              | (1.3)          | 1.4            | n/m        |
| <b>Adjusted EBITDA</b>                        | <b>\$ 44.6</b>     | <b>\$ 39.9</b> | <b>\$ 4.7</b>  | <b>12%</b> |
| <i>Adjusted EBITDA Margin</i>                 | 51%                | 55%            |                |            |
| <b>Normalized FFO</b>                         | <b>\$ 31.2</b>     | <b>\$ 23.6</b> | <b>\$ 7.6</b>  | <b>32%</b> |
| <b>Normalized FFO per share<sup>(1)</sup></b> | <b>\$ 0.48</b>     | <b>\$ 0.37</b> | <b>\$ 0.11</b> | <b>31%</b> |
| <b>AFFO</b>                                   | <b>\$ 29.8</b>     | <b>\$ 20.8</b> | <b>\$ 9.0</b>  | <b>43%</b> |

- Revenue growth of 20% over prior year
- NOI of \$54.9M, up 14% over Q4'13, driven by revenue; NOI margin down 3 percentage points driven by higher electricity usage, with metered power reimbursements up \$5.2M vs. Q4'13
- Adjusted EBITDA of \$44.6M, up 12% over Q4'13; driven by higher NOI, partially offset by increase in payroll and additional SOX and COSO compliance requirements
- Increases in Normalized FFO and AFFO of 32% and 43%, respectively, primarily due to growth in Adjusted EBITDA and a decrease in interest expense

**Notes:**

1. Weighted average diluted common share or common share equivalents for Q4 2014 and Q4 2013 were 65.3 million and 64.6 million, respectively.

# Sequential P&L Analysis

Continued strong sequential growth

| (\$ Millions)                                 | Three Months Ended |                | Fav/(Unfav)    |           |
|---|--------------------|----------------|----------------|-----------|
|   | Q4 2014            | Q3 2014        | \$             | %         |
| Revenue                                       | \$ 86.9            | \$ 84.8        | \$ 2.1         | 2%        |
| Property operating expenses                   | 32.0               | 33.0           | 1.0            | 3%        |
| <b>Net Operating Income (NOI)</b>             | <b>54.9</b>        | <b>51.8</b>    | <b>3.1</b>     | <b>6%</b> |
| <i>NOI Margin</i>                             | 63%                | 61%            |                |           |
| Sales and Marketing                           | 3.1                | 3.2            | 0.1            | 3%        |
| General and Administrative                    | 9.9                | 9.0            | (0.9)          | -10%      |
| Less: Non-cash Compensation                   | (2.7)              | (2.6)          | 0.1            | 4%        |
| <b>Adjusted EBITDA</b>                        | <b>\$ 44.6</b>     | <b>\$ 42.2</b> | <b>\$ 2.4</b>  | <b>6%</b> |
| <i>Adjusted EBITDA Margin</i>                 | 51%                | 50%            |                |           |
| <b>Normalized FFO</b>                         | <b>\$ 31.2</b>     | <b>\$ 28.9</b> | <b>\$ 2.3</b>  | <b>8%</b> |
| <b>Normalized FFO per share<sup>(1)</sup></b> | <b>\$ 0.48</b>     | <b>\$ 0.44</b> | <b>\$ 0.04</b> | <b>8%</b> |
| <b>AFFO</b>                                   | <b>\$ 29.8</b>     | <b>\$ 29.1</b> | <b>\$ 0.7</b>  | <b>2%</b> |

- Sequential revenue growth of 2% driven primarily by strong leasing in prior quarters
- Property operating expenses down 3% driven by seasonality in electricity expense
- Higher General and Administrative expenses driven primarily by higher consulting fees, payroll, and the timing of accounting fees
- Normalized FFO increase primarily driven by higher Adjusted EBITDA
- AFFO increase primarily driven by higher Normalized FFO and lower recurring capital expenditures, partially offset by higher leasing commissions and higher deferred revenue and straight line rent adjustments

**Notes:**

1. Weighted average diluted common share or common share equivalents for Q4 2014 and Q3 2014 was 65.3 million.

# Portfolio Overview

Utilization remains high

## Capacity / Utilization<sup>(2)</sup> Highlights

- 16% increase in available CSF capacity<sup>(1)</sup> compared to December 31, 2013
- Utilization<sup>(2)</sup> up 3 percentage points versus December 31, 2013
- Commissioned 37,000 leased CSF in Phoenix in October 2014
- Annualized rent from owned facilities increased to 79% as of December 31, 2014, up from 63% as of December 31, 2012
- Total Q4'14 capital expenditures of \$89.3 million compared to \$63.0 million in Q4'13

### Notes:

1. Colocation square feet (CSF) represents NRSF currently leased or available for lease as colocation space, where customers locate their servers and other IT equipment. Net rentable square feet (NRSF) represent the total square feet of a building currently leased or available for lease based on engineers' drawings and estimates but does not include space held for development or space used by CyrusOne.
2. Utilization is calculated by dividing CSF under signed leases for available space (whether or not the lease has commenced billing) by total CSF.

## Net Debt and Market Capitalization

Continued low net leverage

| (\$ Millions)                          | December 31, 2014 |
|--|-------------------|
| 6.375% Senior Unsecured Notes due 2022 | \$374.8           |
| Revolver and Term Loan                 | 285.0             |
| Capital lease obligations              | 13.4              |
| Less: Cash and cash equivalents        | (36.5)            |
| <b>Net debt</b>                        | <b>\$636.7</b>    |

| Net Debt                               |                                   |                                      | 636.7                    |
| <b>Total Enterprise Value (TEV)</b>    |                                   |                                      | <b>\$2,434.4</b>         |

- Net leverage of 3.6x<sup>(1)</sup>
- Repurchased \$150.2 million of \$6.375% Senior Unsecured Notes in open market transactions

**Notes:**

1. Calculated as net debt as of December 31, 2014, divided by Adjusted EBITDA for the last quarter annualized.

# Dividend

50% increase in quarterly dividend

Dividend<sup>(1)</sup> per Share Growth

- 50% increase in quarterly dividend announced for Q1'15
- AFFO and dividend per share growth of 53% and 31%, respectively, in 2014
- Annualized dividend yield of 4.5% based on Feb. 17 closing stock price

**Notes:**

1. 2015 reflects Q1'15 dividend.

## 2015 Guidance

### Introducing 2015 guidance

| Category<br>(\$ Millions except for Normalized FFO)                               | 2014<br>Results | 2015<br>Guidance |
|---|-----------------|------------------|
| Total Revenue   | \$331           | \$370 - \$385    |
| Base Revenue  | \$290           | \$322 - \$332    |
| Metered Power Reimbursements  | \$41            | \$48 - \$53      |
| Adjusted EBITDA   | \$169           | \$185 - \$195    |
| Normalized FFO per diluted common share or common share equivalent <sup>(1)</sup> | \$1.73          | \$1.90 - \$2.00  |
| Capital Expenditures  | \$284           | \$215 - \$240    |
| Development <sup>(2)</sup>  | \$280           | \$210 - \$230    |
| Recurring   | \$4             | \$5 - \$10       |

**Notes:**

1. Assumes weighted average diluted common share or common share equivalents for 2015 of 66 million.
2. Development capital is inclusive of capital used for the acquisition of land for future development.

# 2014 / 2015 Development

Expect to bring 275-325K CSF <sup>(1)</sup> online in 2015

## 2014 Development

- Began construction on 4 new facilities totaling 685K square feet of powered shell
  - Phoenix 2 completed early Q4'14 (37K CSF<sup>(1)</sup> / 6 MW); Northern Virginia completed Q1'15 (30K CSF<sup>(1)</sup> / 6 MW)
  - Expected completion of Houston West 3 and San Antonio 2 in 2015
- Delivered nearly 185K CSF<sup>(1)</sup> across Texas markets and in Phoenix
- Added 21 MW of power capacity and an additional 21 MW related to Custom Solutions product

## 2015 Development

- Anticipate construction or purchase of 300-400K square feet of powered shell (Austin, Northern Virginia, and Phoenix)
- Expect to bring 275-325K CSF<sup>(1)</sup> online in 2015
- Expect to add 20-25 MW of power capacity
- Anticipate ending 2015 with ~1.5M CSF<sup>(1)</sup>

**Note:**

1. Colocation square feet (CSF) represents NRSF currently leased or available for lease as colocation space, where customers locate their servers and other IT equipment. Net rentable square feet (NRSF) represents the total square feet of a building currently leased or available for lease, based on engineers' drawings and estimates but does not include space held for development or space used by CyrusOne.
